

MOUNT VERNON AVENUE - PLANNED CAPITAL IMPROVEMENTS

BACKGROUND

Mount Vernon Avenue between Braddock and Hume is scheduled for resurfacing. In conjunction with the resurfacing, the City plans to install ADA-compliant pedestrian improvements at some transit stops and intersections. Bicycle signage and on-street markings (sharrows) will also be added.

PROJECT PLANS

- . Resurface between Braddock Road and Hume Avenue.
- . Provide ADA-compliant pedestrian safety improvements at bus stops similar to the existing bus bulbs at Mount Vernon Avenue and Kennedy Street (shown to the right).
- . Consolidate bus stops to balance accessibility, pedestrian/driver safety and on-street parking.
- . Upgrade curb ramps and crosswalks to improve pedestrian safety along the corridor.
- . Provide shared bicycle signage and “sharrows.”
- . Ensure construction process minimally impacts residents, businesses, access to parking & planned events.

NEXT STEPS (JULY THRU WINTER 2016)

- . **Interim maintenance & community outreach**
- . Engineering survey to gather necessary geospatial data
- . Develop conceptual designs for up to 18 sites

FUTURE OUTLOOK

- . Summer/fall 2016: Interim street maintenance
- . 2016-17: Design process and utility coordination
- . 2017-18: Bid & award process, begin construction
- . Mid-2018– early 2019: Complete construction
